'I didn't know the work of Paul Jaras until I attended the Gala at United Floral last September. I was quite impressed with his techniques and out of the box creativity. He designs for all tastes, using an amazing array of colours and materials. Surely something not to be missed.'

'I liked very much how he incorporated his architecture background into his designs. He also spends a lot of time sketching work he plans to create as well as work he sees other designers create. I thought he had a lot of traditional bones in his designs but with an updated twist.'
Sharon, Guild Member
